

AI Laboratory Good Scientific Practice Workshop: Empowering Researchers in the AI Era

December 3rd 2024, 09:00-16:00 hrs, virtual on zoom

Designed to equip clinician scientists, PhD students and postdocs with essential skills for navigating the exciting world of generative AI in scientific research

What You'll Gain:

- Comprehensive understanding of generative AI applications in science
- Insights into maintaining scientific integrity while leveraging AI tools
- Practical guidelines for integrating AI into your research responsibly
- Foresight to address future challenges in AI-driven research

Workshop Highlights:

- Interactive sessions led by experienced scientists and certified facilitators
- Hands-on activities exploring real-world AI scenarios in research
- Collaborative development of field-specific AI guidelines
- Tailored learning experiences for natural and life sciences

Why Choose This Workshop:

- Led by PD Dr. ès sc. Alexander Schiller
- Over 19,000 scientists trained since 2011
- Proven track record with leading research institutions
- Practical, directly applicable skills for your scientific career
